

Micro Vickers Hardness Testing Machines HM-100

Catalog No. E4201-810

Redesigned range now even better for
making hardness measurements on the smallest
specimens

Mitutoyo

Micro-Vickers Hardness Testing Machines

The HM-100 Micro-Vickers hardness testing range now has a newly designed indenter/objective turret and control unit to expand the measurement application range. The new turret has three objective mounts and, by using the calibration function, all three objectives can be used for indentation measurement. For easy setup of Knoop hardness measurement, the turret has a dedicated mount for a Knoop indenter. The new separate control unit allows a choice of two types of display. The LED type uses a durable membrane switch for tough workshop environments while the LCD type provides touch-screen functionality. All operations including statistical data processing, data conversion to other hardness scales and condition setting for OK/±NG tolerance judgment can be performed by simply touching the LCD screen.

Multi-functional models

Automatic indentation detection program
VLPAK2000 Order No. 810-312-2■*1

For hardness measurement, the diagonal length of an indentation must be measured on the TV monitor, and operator variation in measurement and labor saving are major issues. The automatic length measuring program VLPAK2000 automatically reads the diagonal length of an indentation and converts the result to a hardness value, reducing measurement errors due to operator variation. In addition, it can read hardness at high speed in only 0.3 seconds, dramatically improving the work efficiency of hardness testing.

It is easy to use with your hardness testing machine (*HM-112, 122, 114, 124, etc.) and provides additional functions.

Stage control system with automatic indentation detection program

AT-400 Order No. 810-314-2■*1

AT-400 has the indentation automatic detection function in addition to the automatic stage control function which is useful for multi-point measurement of hardness. It improves operational efficiency and reduces measurement result variations due to operator bias at the same time.

It is easy to use with your hardness testing machine (*HM-112, 122, 114, 124, etc.) and provides additional functions.

Features

Indentation/measuring system

- A wide range of test force from $4.903 \times 10^{-3} \text{N}$ to 19.61N^* is available for measuring various type of specimen. The load dwell time can be set in 1sec increments between 5 and 999sec^{**}. The minimum indentation resolution is $0.01 \mu\text{m}^{***}$. This allows small indentations to be measured with high precision.

* HM-124/125
 ** 60sec: HM-102/103
 HM-101 (5sec increments)
 *** $0.1 \mu\text{m}$: HM-102/103, $0.1 \mu\text{m}$: HM-101

Indentation on a structural material

- Up to three* objectives can be installed on the turret mount (except for HM-101). The calibration function allows all objectives installed to be used for the measurement. This expands the application of the instrument considerably. The magnification can be switched according to the size of the indentation.

*two: HM-102/103

- In addition to the standard Vickers indenter, an optional Knoop indenter can be installed at the next mount on the turret*. A simple turn of the turret makes the HM-100f a Knoop hardness testing machine.

*except for HM-101, HM-102/103

- The power turret* can switch indenter/objective position by a single touch on the LCD screen.

*HM-122/123
HM-124/125

- The indenter/objective turret provides high positional accuracy and repeatability. This allows the HM-100 to indent the target point exactly after identifying it through the objective lens so that the hardness of a minute area (like crystal grain boundaries or deposited metal edges) can be measured simply and accurately.

Pattern of PCB

CCD video monitor system*

- Indentation measurement on the 9-inch monitor reduces operator's eye fatigue and therefore operator error.
- Flicker-free images on the video monitor due to the use of the a vibration- and shock-resistant CCD camera.
- With the optional video printer connected, video images can be printed out easily.

*HM-103, HM-113, HM-123, HM-115, HM-125

Control unit

Touch screen type

HM-112/113, HM-122/123, HM-114/115, HM-124/125

- Back-lit LCD graphic display for Indentation size (D1 and D2)
Hardness value and scale
Number of measurement points
XY table position
Test conditions (HV/HK indenter type, test force, load dwell time) OK/±NG tolerance judgment
Cylindrical and spherical surface compensation and offset
- Remote selection of the test force*
- Remote control of power turret**
- Complete conversion to other hardness scales
(Soft metal: HV, HK, HBS, TENS, HRA/B/F/G/15T/30T/45T)
(Hard metal: HV, HK, HS, HBS, TENS, HRA/C/D/15N/30N/45N)
- Powerful statistical processing (No. of data, max./min./mean values, range, upper/lower limit values, standard deviation (n, n-1), No. of pass/defective) with flexible data point editing and 256 data memory

* HM-114/115, HM-124/125

**HM-122/123, HM-124/125

Durable membrane switch type

HM-102/103/131

- LED display for Indentation size (D1 and D2) and hardness value
- OK/NG tolerance judgment

Touch screen type

Durable membrane switch type

Control unit

Touch screen type:

HM-112/113, HM-122/123,
HM-114/115, HM-124/125

- LCD
- Indentation size (D1 and D2)
- Hardness value/converted hardness value and scale
- Number of measurement points
- XY table position
- Test conditions (HV/HK indenter type, test force, load duration)
- OK/±NG tolerance judgment
- Cylindrical and spherical surface compensation and offset

Durable membrane switch type:

- HM-102/103
- LED display
 - Indentation size (D1 and D2)
 - Hardness value
 - OK/NG tolerance judgment

Resolution of indentation measurement

0.01μm/0.1μm (HM-102/103)/0.1μm (HM-101 with 50X objective)

Data output*

RS-232C, Digimatic Code and Centronics

*Except for HM-101

Power supply

100/120/220/240V AC (not switchable), 50/60Hz

Power consumption

Approximately 60VA

Dimensions (WxDxH)

Machine: 410x600x590mm (16.14"x23.62"x23.23")
Control unit: 165x260x105mm (6.50"x10.23"x4.13")

Mass

Approx. 42kg (92.4 lb.)

Optional Accessories

Printers

Digimatic Mini-Processor DP-1VR

A cost-effective portable printer capable of making statistical calculations with up to 100,000 pieces of data. The DP-1VR can be connected to a hardness testing machine with an SPC output.

Specimen clamping devices

Specimen (thin plate) holder

Secures a plate or foil-like specimen.

Order No.
810-013

Specimen thickness: 5mm (.197") or less

Specimen (wire) holder

Used to secure a wire or needle type specimen horizontally.

Order No.
810-014

Specimen diameter: 0.4 to 3mm (.015" to .118")

Specimen (wire or ball) holder

Used to secure a wire or ball type specimen vertically.

Order No.
810-015

Specimen diameter: 0.4 to 3mm (.015" to .118")

Rotary table

Used to rotate a specimen by 1° increments

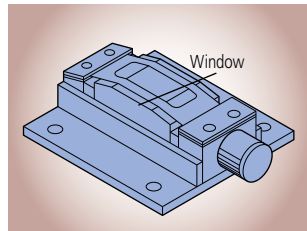

Order No.
810-018

Adjustable specimen (thin plate) holder

Secures a plate or foil-like specimen.

Order No.
810-085

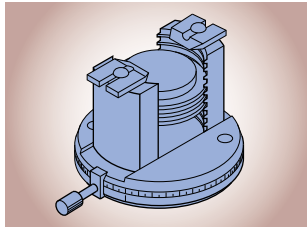

Window size: 25x10mm (.98"x.39")
Specimen thickness: 3mm (.118") or less

Rotatable universal specimen holder

Used to secure a specimen, that has a measuring surface that is hard to stabilize, perpendicular to the indenter axis.

Order No.
810-084

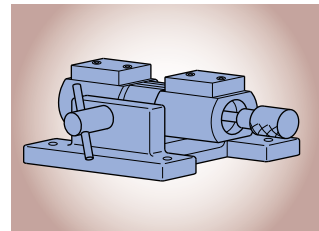

Specimen thickness: 32mm (1.25") or less
Specimen diameter: 38mm (1.49") or less

Specimen tilting holder

Used to secure a specimen that has a measuring surface not perpendicular to the indenter axis.

Order No.
810-019

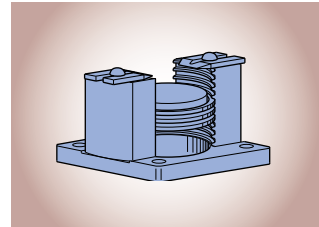

Max. opening: 37mm (1.45")
Tilting: ±15°
Rotation: ±25°

Universal specimen holder

Used to secure a specimen, that has a measuring surface that is hard to stabilize, perpendicular to the indenter axis.

Order No.
810-020

Specimen thickness: 30mm (1.18") or less
Specimen diameter: 38mm (1.49") or less
